

RUSSIAN-FINNISH COOPERATION
in HIGHER EDUCATION:
a STUDENT's VIEW

Elena Terekhina
Department of World Economy and International Economic
Relations
Chair of the Young Scientists' Council
UNECON

Where I am now

- PhD thesis in work: “Opportunities and risks of international strategic alliance development in ICT sector (the evidence of Finland)”
- Two exchanges complete
- Two diplomas (bachelor, specialist) based on the analysis of the Finnish companies
- Intensively using the experience and teaching methods acquired in Finland in research and work with students

How it started

- First exchange in 2010
- One semester studies in Finland
- Starting point for the research:
“Internationalization of the Finnish telecommunication companies”
- Internationalization strategies => alliances
- Telecom => ICT (information and communication technology)

Other stories

What has Finnish-Russian exchange given to you?

- Meeting a lot of interesting people. Achieving “international synergy effect”.
- Learning Finnish, improving English
- Teaching and research approaches to IT and economic sciences
- Learning culture, traditions and the Kalevala
- Time-management and self-organization

Conclusion

Russian-Finnish cooperation in higher education enriches the young people's minds and intellectual capitals of both countries and deepens the interaction between our two countries.
